Annual Report

Us TOO International
Prostate Cancer Education & Support Network
January 1 – December 31, 2005

Prostate cancer

- In 2005, approximately 232,090 men were diagnosed with prostate cancer, and about 30,350 died. (American Cancer Society 2005)
- Prostate cancer is the second leading cause of cancer death for men in the United States. (American Cancer Society 2005)
- A man is 33% more likely to get prostate cancer than a woman is to get breast cancer. (Prostate Cancer Foundation)
- A man with one close relative with the disease has double the risk. With two close relatives, his risk is five-fold. With three, the chance is 97%.
- African American males have a prostate cancer incidence rate up to 60% higher than white males and double the mortality (death) rate of white males. Every 100 minutes an African American male dies from prostate cancer.
- Men with a body mass index over 32.5 have about a one-third greater risk of dying from prostate cancer than men who are not obese.
- Prostate cancer is mainly found in men age 50 and over. With the aging of the baby boomer generation, and the aging of America, prostate cancer is thought to be the fastest growing cancer.
- Two men every five minutes are diagnosed with prostate cancer. If detected early, prostate cancer is often treatable.
- Prostate cancer impacts the entire family, not just the patient.
- Majority of deaths from prostate cancer are related to advanced disease with metastases.

our mission

To communicate timely, personalized and reliable information enabling informed choices regarding detection and treatment of prostate cancer.

Celebrating the past. Looking to the future.

This year marked the 15th Anniversary of Us TOO.

In September we paused to thank the people and the organizations that started Us TOO in 1990. We formed the *Founders Fund* to recognize the leadership of those who created Us TOO and to give us new resources so we can do more.

Much has changed in 15 years. And we have accomplished so much. However, despite similar incidence and mortality rates, prostate cancer awareness and program activities lag behind the accomplishments of the breast cancer community. It is estimated in 2006, 234,000 more men will be diagnosed and over 27,000 will die from prostate cancer. In 2006 the leading edge of the baby boomers will be turning 60 and more of the world's population than ever before will move into the age of risk.

While we celebrate our current and past accomplishments, our job is not done...

A

Message from Jim Kiefert

Chairman of the Board
Us TOO
International, Inc.

The year 2005 was a year of transition for Us TOO International.

Tom Kirk started as President/CEO in November of 2004 and I started my new term as Board Chairman in January of 2005. As we assumed our roles, we spent many hours discussing how to meet the goals and implement the new 2004-2007 Strategic Plan for Us TOO.

Our first decision was that we would work cooperatively and collaboratively with other prostate cancer organizations. We were a fresh new team and we wanted to start with a clean slate, extending our hand with sincere caring and cooperation to other organizations working to provide prostate cancer information and support.

We also agreed that what made us different from other prostate cancer organizations is the Us TOO volunteer Network of approximately 325 local peer-to-peer self-help chapters. As a result, we decided to primarily focus our energy and resources on supporting local chapter volunteers.

To this end, we focused on our Regional Directors, the volunteers who mentor and support chapter volunteers in their region. We held quarterly conference calls designed to bring them up to date on the activities and direction of the home office, to listen to comments and concerns, and find ways to help them do their jobs more effectively. We also planned a meeting of the Regional Directors in conjunction with one of our quarterly Board of Directors meetings, so we could meet one another and help build a team spirit.

Tom also assigned a full time staff person to work with our local chapter leaders and Regional Directors. This further demonstrated our commitment to helping chapter leaders with the valuable work they do.

Several committees of board members and chapter volunteers, one headed by Board member Russ Gould, developed a Chapter Leaders Handbook and new educational materials.

In addition during 2005, another group of Board members and volunteers was lead by Board member Jo Ann Hardy and developed and launched a new Companions and Families Program, the Circles of Love.

The Us TOO University concept was also introduced in 2005 and will be launched in 2006. Through Us TOO University, we will educate and train our chapter leaders and regional directors, providing skills, tools and information to assist them in their local chapters.

Us TOO celebrated a critical milestone in 2005 – 15 years of unwavering support to the prostate cancer community. We are proud of the accomplishments of those who preceded us and we strive to uphold and exceed the example they have set for us.

I have long been impressed with the respect Us TOO receives from other prostate cancer organizations and the medical community. I believe this reflects well on the work of our previous CEO and Board Chair, as well as each and every Regional Director, Chapter leader, volunteer and staff member.

It is our goal to build on this respect and make it even stronger. I am pleased to say that in 2005, Us TOO was accepted as a National Health Council member and used their rigorous standards to improve the operations of our organization.

As we look to the future, we will continue to focus on our mission of *communicating information to enable informed decisions* for men and their companions and families from the issues of early detection through the complicated decisions of ongoing treatment and the lack of options with advanced disease.

Sincerely,

A handwritten signature in black ink, appearing to read "Russ Gould", with a long horizontal flourish extending to the right.

A

Message from

Thomas Kirk

President and CEO

Us TOO

International, Inc.

I am so pleased to have the opportunity to provide our second Annual Report and address all of you after my first full year here at Us TOO. It was a very special year.

During Prostate Cancer Awareness Month, we thanked the people and the organizations that started Us TOO. It was our Founders' desire to help themselves and others affected by prostate cancer that lead them to follow the path of Y-ME National Breast Cancer Organization. As Y-ME brought breast cancer into the open through their peer-support "meetings at the Y," ***it was our Founders' vision to create an organization for "us too" to assure that no one faces prostate cancer alone either.***

We recognized the leadership of Dr. Gerald Chodak, John DeBoer, Edward Kaps, Vincent Young, John Moenck and Edward von Holst. I was excited to see our two surviving Founders and Directors Emeritus Ed Kaps and John De Boer and the families of our other Founders at the event.

Because of growing support, it has been my pleasure this year to move Us TOO forward on many fronts, ***expand our program area budget by more than one-third*** and see such advances as:

- increasing awareness levels through additional collaborations
- upgrading and launching a new Us TOO Webpage
- expanding the Minority and Underserved Populations program
- developing and launching a new Companions and Families Program... the *Circles of Love Program*
- developing new materials for the Advanced Prostate cancer patient
- updating our core publications.

I also want to express my gratitude and appreciation to all of our Board members, volunteers and our growing staff, especially to Board Chairman Jim Kiefert (a self described 16-year prostate cancer warrior) who assumed his new role in January and worked tirelessly with a spirit of collaboration and partnership. He represents the enthusiasm and positive energy found in the other members of the Board of Directors and the vast number of volunteers who are in the Us TOO Network.

After my first year, I remain convinced that together we can make a difference and fearlessly drive forward the mission of Us TOO to *communicate timely, personalized and reliable information enabling informed choices regarding detection and treatment of prostate cancer.*

Sincerely,

Us TOO recognized founders and founding partners

In September 2005, Us TOO acknowledged our founders and founding partners for unwavering support of Us TOO since its inception in 1990. The presentation was made Sept 17, 2005 in conjunction with the Us TOO / Wellness Place Symposium and gala event held in Schaumburg, Illinois.

*"For monumental contributions as a Founder of
Us TOO International"*

Award recipients and Us TOO representatives. Seated, L to R: **Jackie Konieczka** - Us TOO International staff, **Margaret Kirk** – CEO of Y-ME National Breast Cancer Organization. Standing, L to R: **Rosalie Villano** - Abbott Oncology, **Jim Salanty** - TAP Pharmaceutical Products, **John De-Boer** – Us TOO Founder, **Ed Kaps** – Us TOO Founder, **Tom Kirk** – President & CEO, Us TOO International, **John Jaekle** – AstraZeneca, **Jim Kiefert, EdD** – Board Chairman, Us TOO International.
Founders in memoriam: John Moenck, Edward G. von Holst, Vincent Young.

FOUNDERS VIDEO:

In 2005, Us TOO created a five minute video outlining the origins of Us TOO, profiling the founders, and discussing Us TOO's journey. This video is now downloadable from the Us TOO website

expanded and redesigned website

In May 2005, the redesigned Us TOO website was unveiled. With a sleek and current look, the site also offers significantly expanded capabilities and an ever-growing number of downloadable resources, including a special section filled with excellent **resources for Us TOO chapter leaders, NEWS You Can Use** and other developing prostate cancer news, **Prostate Pointers** chat lists and more. In addition, current and archived issues of Us TOO's **Monthly HotSheet newsletter** are accessed extensively by thousands of online users.

The upgraded website has experienced sizeable growth and usage, **growing from an average of 50,000 hits per month to a staggering 347,000 average hits per month.** In addition, we now have the capability to analyze the performance and usage of the website in a variety of ways and in numerous formats.

Special Thanks to Abbott Oncology for project support

the
world.

thriving in 2005

Minority and Underserved Populations Program

Us TOO, working with funding from the Federal Centers for Disease Control (CDC) and regional and community organizations, is striving to reduce the high mortality rate among minorities in underserved communities dealing with prostate cancer. This program began in 2003 with four pilot sites and continued to expand in 2005 to nineteen high incidence states and areas. More than 200 facilitators have been trained, new volunteers serving as Site Coordinators/Leaders and nearly 100,000 people touched through the program's outreach efforts.

In September 2005, the Centers for Disease Control and Prevention (CDC) formally notified Us TOO that it would receive "Year 3 funding" for the efforts in "Early Detection or Survivorship of Cancer in Underserved Populations Program."

Support for Companions and Family Members

The Circles of Love Companion and Family Support Initiative was a concept in 2004. In 2005 the program made significant progress toward its goals.

- The Circles of Love Care Kit was completed. The care kit is an excellent resource collection for friends and loved ones of those facing the battle against prostate cancer.
- An advisory panel was formed to move the project into the next phase. The panel began creating a complete Discussion Guide to accompany the Circles of Love Care Kit and the book, *Circles of Love Collection*

Special Thanks to Abbott Oncology for project support

prostate cancer education and awareness

“Strive For A Cure” Wristband

Us TOO launched the **STRIVE Initiative** to increase awareness and support men and their families through their prostate cancer journey. Wearing a wristband is an easy way for you to spread the word, start conversations and show your support. Proceeds from wristband sales will be used to provide free Us TOO educational materials and support group services for prostate cancer patients and their families. In 2005, people requested nearly 40,000 wrist bands.

Special Thanks to TAP Pharmaceuticals

Senate Passes Initiative

On Friday, July 29, 2005, the U.S. Senate unanimously adopted a resolution (SR230) proclaiming September as National Prostate Cancer Awareness Month. In each of the preceding 5 years, the U.S. Senate has issued a 1-year resolution and the President has declared the month of September as Prostate Cancer Month. Now that the Senate has passed the initiative, September will always be known as National Prostate Cancer Awareness Month.

Us TOO Awareness Activities

Us TOO participated in numerous events designed to heighten awareness of prostate cancer. For example:

- Us TOO co-sponsored the National Conference on Prostate Cancer with the Foundation for Cancer Research and Education in Washington, DC
- Us TOO teamed up with **HealthTalk** for a webcast about the challenges and advancements in prostate cancer and hosted a nation wide teleconference on Bone Health
(Special Thanks to sanofi aventis)
- Us TOO released the results of a *Late Stage Prostate Cancer Quality of Life Survey* *(Special Thanks to Abbott Oncology)*

Prostate cancer education and awareness

We want to recognize a special group of volunteers who faithfully assist with:

- shipping and delivery of the monthly Us TOO's premiere newsletter, the **HotSheet**
- serving as telephone support volunteers for many of the callers to our Us TOO Helpline.

Currently, Us TOO provides nearly 20,000 **HotSheets** and responds to nearly 300 callers each month, all made possible with the support of our volunteers.

In 2005 Us TOO created three new educational booklets and brochures, available in printed form and as downloadable documents from the Us TOO website:

- *What You Need to Know for Better Bone Health*
- *Prostate Cancer Patient's Guide to Hormone Therapy*
- *What now? Hope and options when experiencing a rising PSA, a recurrence of prostate cancer, or when prostate cancer is not responding to treatment*

Special Thanks to Novartis Oncology, Astra-Zeneca and TAP Pharmaceuticals

september 2005

prostate cancer awareness month

Prostate Cancer

Awareness Month

Prostate Cancer was commemorated with a wide variety of activities. Many Us TOO chapters and hospitals scheduled events in their area to make people aware of prostate cancer issues and early detection. While the events and initiatives are too numerous to recount here, here are a few of note during one weekend in Chicago:

- Greater Chicago-area Run, Walk 'n Roll event developed in partnership with the Us TOO-Don Johnson Chapter and the Wellness Place.
- As a pre-walk event, a special symposium featuring Dr. Charles “Snuffy” Myers, Dr. Brian Moran and Dr. Charles Brendler was created.

Greater Chicago Run, Walk n' Roll, September 2005

Chapter profile

Chapters in San Antonio and Hawaii both received written proclamations from their local government officials declaring September as Prostate Cancer Awareness Month.

Chapter news

In honor of Prostate Cancer Awareness Month, September 2005, Us TOO International home office introduced the Regional Director Peer Recognition Awards and Chapter Spotlight Awards.

The first to receive the **Regional Director Peer Recognition Awards**, were:

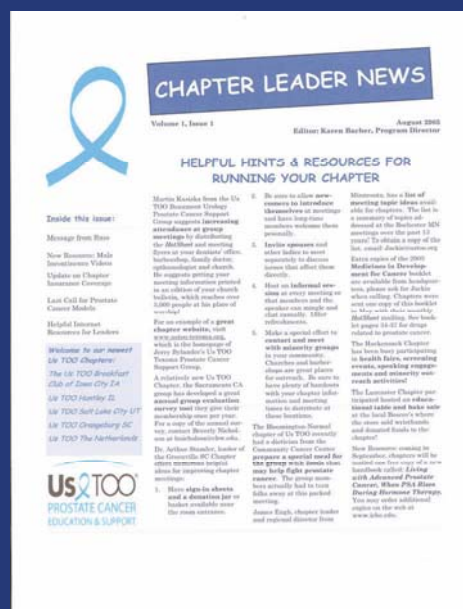

- Roland Young, RD for SC & FL
- Harry Pinchot, RD for CA

Roland and Harry received the most votes from their peer directors and are truly deserving of the award. They both have touched the lives of countless men and families.

The Chapter Spotlight Award was created to honor the diversity and commitment of Us TOO chapters and their leaders. These chapters were selected from numerous impressive nominations to receive the first Chapter Spotlight Award:

- Cincinnati, OH
- Greenville, SC
- UPMC Cancer Center, Pittsburgh, PA
- WRAMC Washington DC
- Tacoma, WA
- Wichita, KS
- Tex Us TOO Houston, TX
- Medical City Chapter, Dallas, TX
- Hackensack, NJ

In 2005, many valuable tools to improve communication within the Us TOO Network were implemented, the chapter advocacy email blasts and the chapter leader news letter are near the top of the list.

volunteer profile

Volunteer Regional Director Fred Gersh has played a critical role as an active advocate representing US TOO at vital meetings of One Voice Against Cancer (OVAC) and the Cancer Leadership Council (CLC) in Washington, DC

chapter profile

Tex Us TOO in Houston held their 6th annual successful “Dad’s Day 5 K” event raising awareness and funds to fight prostate cancer

chapters

Us TOO has nearly 320 Support Group Chapters Worldwide. Us TOO group meetings are free and open to all men, family, friends, and health professionals interested in prostate cancer/disease.

Us TOO support groups function as independent chapters, forming a global support and education network. Each chapter holds regular meetings for men living with prostate cancer and their families. The meetings provide unbiased information from experts in areas related to prostate cancer, including surgery, radiation, medications, nutrition, and psychology.

growing up and branching out

National Health Council

In 2005 Us TOO was accepted as a Member of the National Health Council in the Voluntary Health Agency category. This follows a formal application and review of Us TOO's corporate structure, financial information and operating policies.

Charity Navigator

On November 4, 2005, Us TOO International received notification that it has received Charity Navigator's highest rating for sound fiscal management. Us TOO received a rating of four out of a possible four stars, an improvement over last year's three star rating. Charity Navigator is an independent charity evaluator, and works to advance a more efficient and responsive philanthropic marketplace by evaluating the financial health of America's largest charities.

The Us TOO Chapter Revenue and Expenses are not part of the Us TOO International, Inc. financial audit conducted by John Kopczyk, Ltd., Certified Public Accountants. The majority of Us TOO chapters are small community groups that do not solicit or raise funds. Reporting information was received from 116 chapters reporting for the calendar year 2005 ending December 31, 2005. The groups in Houston, Pittsburgh and Boston reported revenues and expenses over required reporting levels.

The unaudited reports submitted by the chapters summarize the revenue and expense activity of their group. The compilation report was compiled from the 3 group's reports and was combined into a report by the Us TOO staff for management reporting purposes and are listed above. The accounting practices of the local Chapter groups are not necessarily the same practices followed by the Us TOO International office.
